

Post-conference symposium:

Control de calidad en transferencia de embriones Bovinos Embryo Transfer Quality control in Cattle

Date: September 8 and 9th, 2018

Place: Granja Kayra, San Jerónimo, UNSAAC, Cusco

Comprising: 13 hrs

Speakers

Patrick Blondin, PhD, Boviteq, Canada

Joao Viana, PhD, EMBRAPA, Brazil

Por definir

Programa preliminar / Preliminar program.

Saturday 8, september

09:00 h Production and transfer of embryos in Latin America, Dr. Joao Viana

10:00 h Certification of laboratories for in vivo or in vitro embryo production, Dr. Patrick Blondin

11:00 h Technical standards and animal health regulations, Dr. Joao Viana

12:00 h Regulations or requeriments for donors of semen, oocytes and embryos, SENASA

13:00 h Break

15:00 h Challenges of embryo exporters with animal health regulations for international trade, Dr. Patrick blondin

16:00 h Practice: Morphological criteria to determine oocyte and embryo quality

Sunday 9, September

09:00 h Advances in synchronization and superovulation protocols,

10:00 h Commercial application of cryopreservation of embryos produced in vitro and in vivo, Dr. Patrick Blondin

11:00 h Use of molecular biology to assess embryo viability, Dr. Jose Fernando Garcia

12:00 h Traceability requirements for semen and embryo products,

13:00 h Break

15:00 h Practice: Labelling of semen and embryo for trade

17:00 h Clausura de curso
